_EXPERIENCES

ICONA
Shanghai, China - Aug.2025 to Dec.2025
Exterior Design Intern at ICONA Design Group.

DACIA x GRAVITY SKETCH
Paris, France - Mar.2024 to Jun.2024
Partnership project with Dacia and Gravity Sketch.

LIGIER
Paris, France - Mar.2024 to Jun.2024
Partnership project with Ligier.

AFRY
Gothenburg, Sweden - Nov.2023 to Feb.2024
Automotive Design Intern at AFRY Experience Studios.

EXTREME
Paris, France - Jun.2023 to Sept.2023
Transportation Design Intern at AdvanceDesign by Extreme.

_EDUCATION

STRATE, SCHOOL OF DESIGN
Paris, France - Sept.2020 to Dec.2025
Graduated in Transportation Design from Strate

LYCEE LEONARD DE VINCI
Saint-Witz, France - Sept.2017 to Jun.2020
High School Economics and Social science diploma (with honors)

_ABOUT ME

Design is a constant journey of discovery, driven by curiosity and a desire to learn from everything around me. I see each project as an opportunity to explore new ideas, challenge conventions, and grow through experimentation. For me, creating is about understanding the world better and finding ways to make it more inspiring and meaningful.

INDESIGN
VIZCOM (AI)
COMFYUI (AI)
LIBLIB (CHINESE AI)

SOFT SKILLS

Creative problem-solving
Team collaboration
Attention to detail
Proactive learning

CELICA

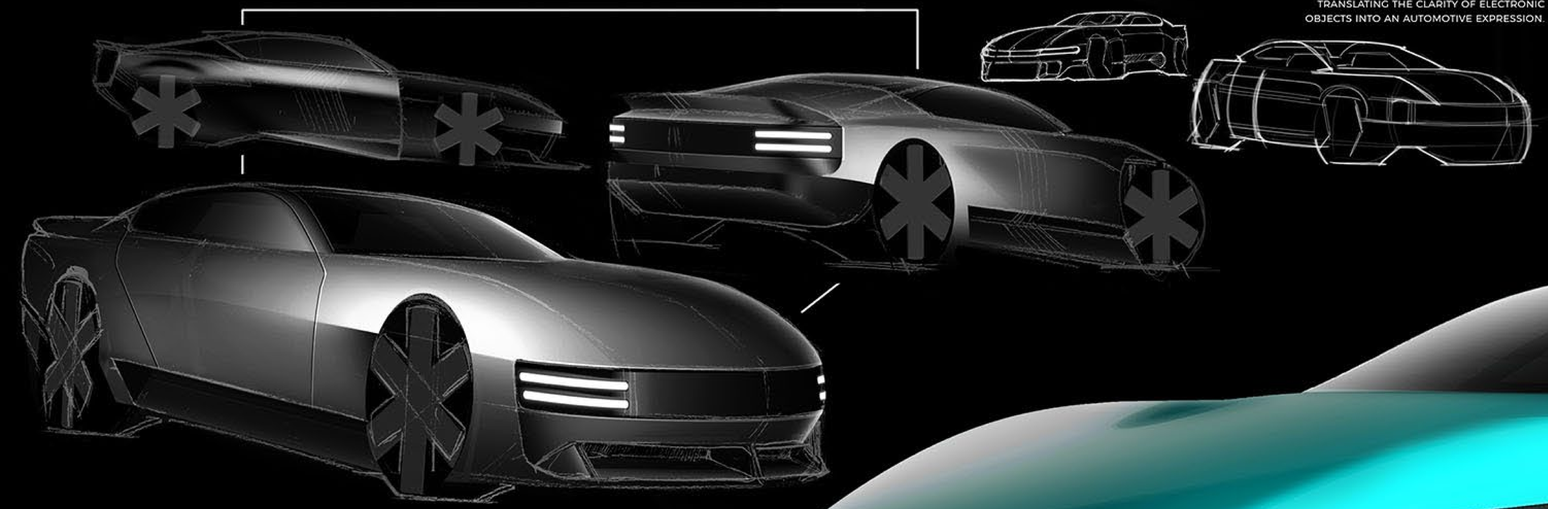
2026

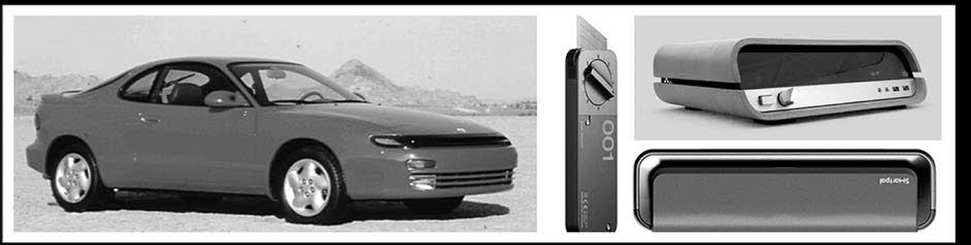
BRIEF /
Reintroduce the TOYOTA Celica as a compact, driver-focused performance coupe for the modern era.

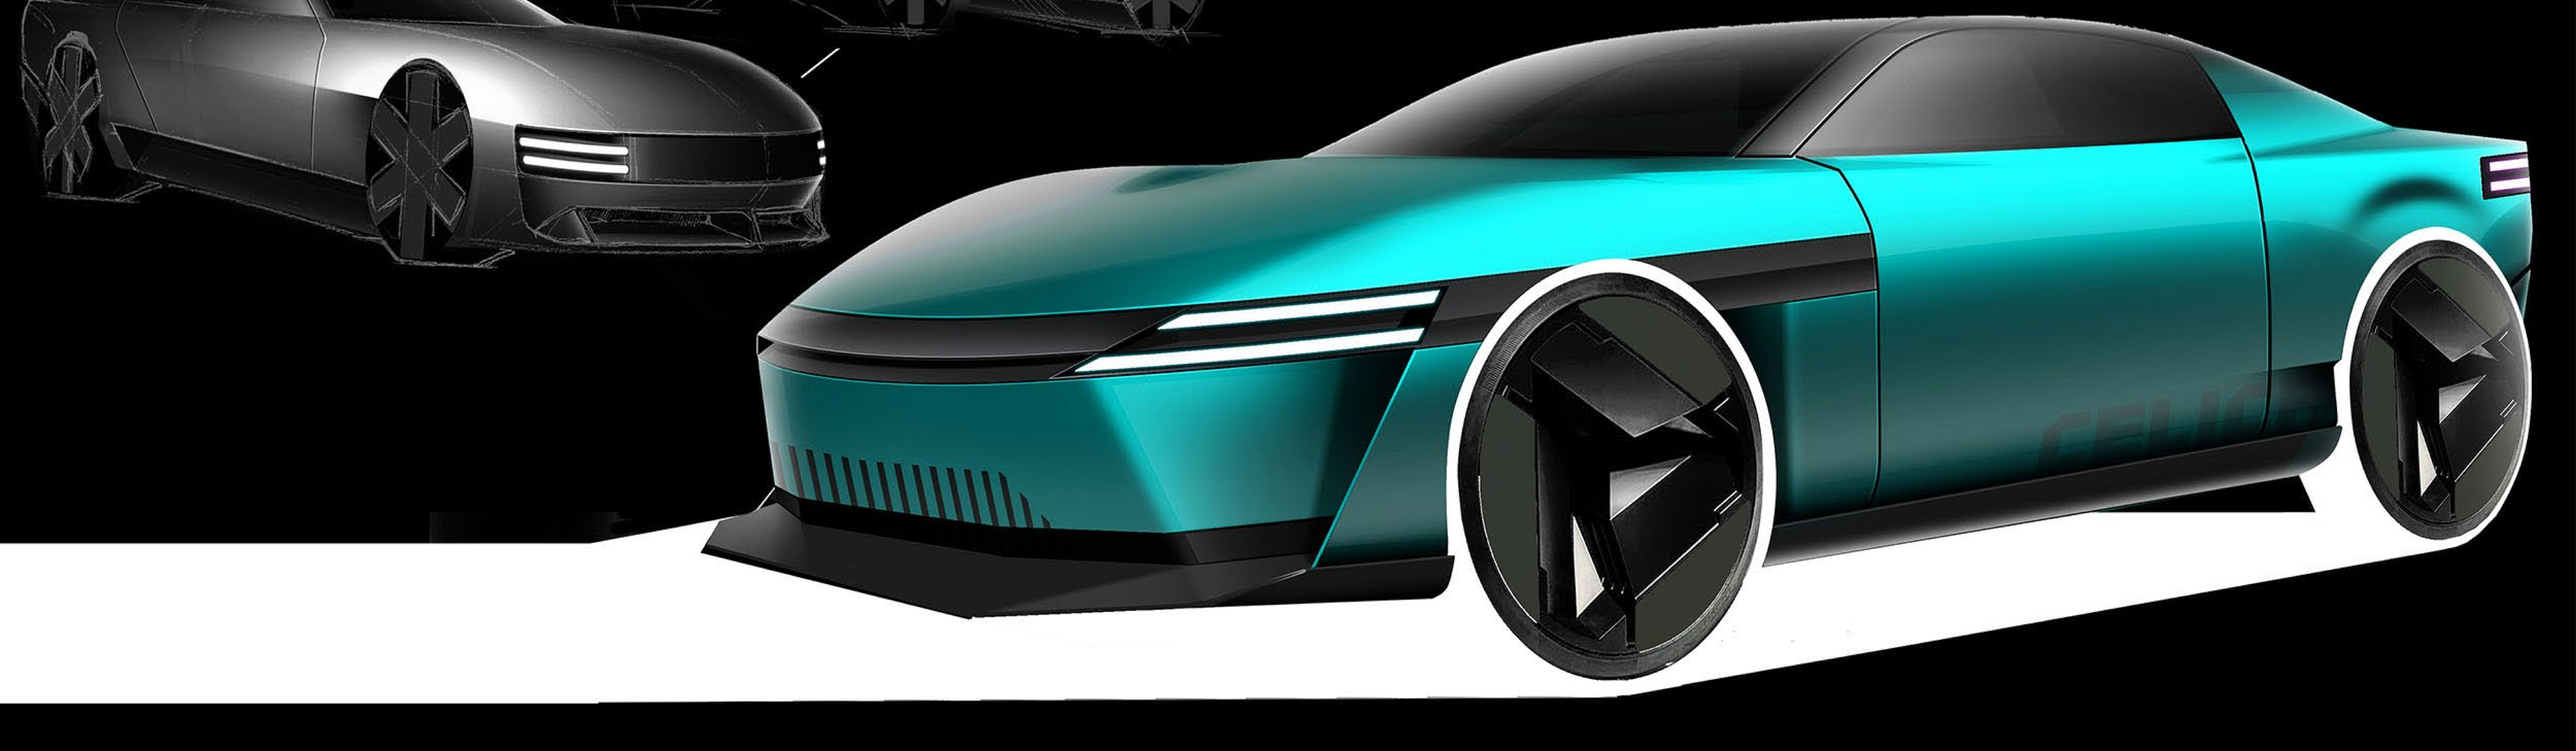
STORY /
Celica RE:FOCUS expresses precision through sharp volumes, balanced proportions, and a lightweight architecture.
Built around agility and control, it delivers pure connection between driver and machine, without nostalgia, without excess.

INDUSTRIAL DESIGN

Exploration of a Celica design language inspired by industrial product design. The focus is on monolithic volumes, soft radii and minimal functional details, translating the clarity of electronic objects into an automotive expression.







GEOMETRIC TENSION

Exploration of a Celica design language based on faceted geometries and sculptural surfaces. Light interaction and sharp transitions create a dynamic and architectural interpretation of the sports coupe.

HONDA Acty.V

As an automotive designer, I wanted to revisit one of Honda's classic models—the Honda Acty. First introduced in the 1980s, the Acty became a beloved compact van in Japan, known for its practicality and versatility. For this project, I've updated the design of the Acty for 2025, maintaining the original charm and functionality while giving it a fresh, modern look. The goal was not to reinvent the wheel, but to breathe new life into the iconic van, ensuring it remains relevant for today's urban environments, with a focus on practical updates that cater to current needs. The result is a refined, timeless version of the Acty that stays true to its roots while offering a glimpse into Honda's future.

DRAGONFLY REACHES PLACES WHERE HELICOPTERS CAN'T LAND, ENABLING RESCUERS TO PICK UP THE VICTIM AND QUICKLY TRANSPORT THEM TO THE HOSPITAL.

2025

MINI Capsule

In response to the evolving urban landscape and the growing need for sustainable mobility solutions, I've envisioned a futuristic MINI for 2050—a fully autonomous taxi designed specifically for cities where personal vehicles may be banned. With the rise of shared transportation and the shift toward greener, more efficient solutions, this MINI taxi blends the iconic charm of the brand with cutting-edge technology. Its compact, agile design is perfect for navigating dense urban environments, while its autonomous capabilities and electric powertrain make it a sustainable alternative to traditional vehicles. This project is a vision for a future where public transport, taxis, and emergency vehicles are the only means of getting around—ensuring safe, convenient, and eco-friendly transportation for everyone.

BMW Apex

The BMW Apex concept is a bold exploration of futuristic automotive design, created as a quick yet ambitious project completed in just one week. Blending cutting-edge aerodynamics with a striking aesthetic, the design features a unique cubic pattern transitioning from pristine white to deep violet, symbolizing innovation and evolution. Despite the rapid timeline, the BMW Apex pushes the boundaries of speed, technology, and luxury, embodying the essence of modern sports car design.

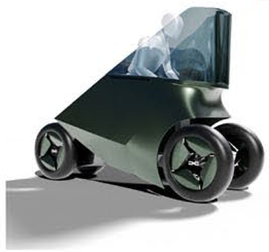
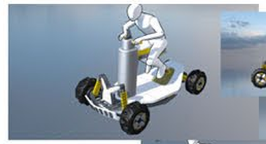
FREE SKETCH

Partnership with
Make a new street legal car for
LIGIER according to the JS2 legacy.

the entire project had to be carried out in VR.





Partnership with **GRAVITY SKETCH** and **DACIA**.
The idea was to explore a new way of getting around town in a world where classic cars were banned in big cities. Group project with Dior GASHI and Noémie FLORESCU.
